

Instructions for Authors Submissions

Two single-sided copies of the manuscript, no longer than 16 pages, should be sent to:

Studia Universitatis Babes-Bolyai, Series Informatica

Babes-Bolyai University
Faculty of Mathematics and Computer Science
str. M. Kogalniceanu 1
400084 Cluj-Napoca
Romania

Authors of accepted papers are encouraged to submit their files via electronic mail to **Studia Informatica: studia-i@cs.ubbcluj.ro** .

Such action is representation by the author that the manuscript has not been published or submitted simultaneously for publication elsewhere. A cover letter must indicate the author to whom correspondence should be sent. Complete addresses (including e-mail addresses) should be provided for all authors. It is self understood that by submitting a paper the corresponding author has the agreement of all co-authors to act on their behalf.

If the Studia office does not acknowledge receipt of your submission within four weeks, please contact Studia Informatica at studia-i@cs.ubbcluj.ro to verify its receipt. Authors should retain copies of all manuscripts, as Studia Informatica will not return them after completion of the review process.

Originality of papers

By submitting a work to be evaluated and published as a paper in our journal the authors implicitly confirm and agree that their paper is an original work, it has not been published before, that all the copyrighted material used in the work has been properly acknowledged.

Acceptance of authors quality

By submitting a work to be evaluated and published as a paper in our journal the corresponding author implicitly confirms that he has previously obtained the full agreement of all co-authors to co-author the submitted work. While the editors send a confirmation email to all authors of the paper, we cannot be certain that our email has indeed reached the intended destination, and we cannot assume anything about any lack of reply.

The evaluation process

The editor-in-chief has the exclusive right to assign papers to members of the editorial board. The editors reserve the right to reject any manuscript that is not completely legible or does not conform to the standards cited below.

All papers are independently reviewed by two peer reviewers. The reviewers fill in due time a standard evaluation form. The reviewers' suggestions or requests for modifications are anonymously communicated to the authors, together with the decision of the editorial board on the publication of the paper.

The format of the submitted papers

Guide for Writing a Scientific Paper

A guide for writing a scientific paper, to be used as a support by our authors, is available here.

The papers will be typeset using the LaTeX 2e system

Studia provides a LaTeX macro package designed to make author-typeset articles conform to Studia style standards with a minimum of difficulty. Please use the standard amsart class together with this Studia package, and see this formatting example.

Title

Titles should be brief and appropriate for indexing and should specifically describe the content of the paper.

Abbreviated title

An abbreviated title, which will be used as a running head, must accompany all articles and must consist of no more than 50 characters (including spaces).

Abstract

An abstract not exceeding 250 words that summarizes the principal techniques and conclusions of the manuscript in relation to known results must accompany each manuscript. Mathematical formulas and bibliographic references should be kept to a minimum; bibliographic references must be written out in full.

Key words and phrases

A list of key words and phrases must accompany all articles.

Subject classifications

AMS Mathematical Subject Classification (2010) and ACM Computing Reviews Categories and Subject Descriptors (1998) must accompany all articles.

Illustrations

All illustrations must be of professional quality with no handwritten elements. Studia will not redraw figures. Illustrations must be numbered consecutively and cited in the text. Previously published material must be accompanied by written permission from the author and publisher.

References

References should be listed in alphabetical order at the end of the manuscript. The following reference styles should be used:

Journal articles (titles of journals should be abbreviated in accordance with Mathematical Reviews):

[7] J. Ziv, A. Lempel, Compression of individual sequences via variable-rate coding, IEEE Trans. Inf. Theory, 24 (1978), pp. 530-536.

Books, pamphlets, research reports:

[2] T. Cormen, Leiserson, C., R. Rivest, Introduction to Algorithms, McGraw-Hill, MIT Press, New-York, 1990.

Paper in a bound collection:

[5] J. L. Lions, Pointwise control for distributed systems, in Control and Estimation in Distributed Parameter Systems, H. T. Banks, ed., Frontiers Appl. Math. 11, Society for Industrial and Applied Mathematics, Philadelphia, PA, 1992, pp. 1-39.

Citations within the text: A consistent style should be used, and the style of in-text citations should conform to the reference style chosen. To refer to a specific page or item in an article or book the following formats may be used: [2, p. 51] or Cormen [2, p. 51].

Copyright notice

When the article is accepted for publication, I, as the author and representative of the coauthors, hereby agree to transfer to Studia Universitatis Babes-Bolyai, Informatica all rights, including those pertaining to electronic forms and transmissions, under existing copyright laws, except for the following, which the author specifically retain: the right to make further copies of all or part of the published article for my use in classroom teaching; the right to reuse all or part of this material in a review or in a textbook of which I am the author; the right to make copies of the published work for internal distribution within the institution that employs me.
